Standing here with foamed hands, surrounded by your kidnapers, unable to stretch your fingers or take a step without your elbows being seized, you can't help but remember that you are trapped on this ship, far from help and home. Your very survival depends on the goodwill of the woman in charge.

Zoa's gaze is steely, and missing some spark of humanity you usually recognize in any new acquaintance.

You say:

- "Did you send Krantic to torture me?"
- "Risky plan, stealing vermite from the Medusi."
- "I'd make a better crew member than a prisoner."
- "I'm ready to bargain for my return to Dekara Station."
- Nothing. I'll let Zoa direct the conversation.

About This Game

You have a choice: join a crew of space pirates to steal priceless slime from a nest of mushroom-like aliens--or hoodwink the pirates and team up with the mushroom colony to prevent an interstellar war!

Reckless Space Pirates is a thrilling interactive science-fiction novel where your choices control the story. The game is entirely text-based--without graphics or sound effects--and powered by the vast, unstoppable power of your imagination.

Will you survive the infamous space-slime pits? Will you earn the respect of the crew, or even start a romance with a space pirate? Can you negotiate with the fungoid aliens, despite linguistic and cultural barriers? Or will you blast their rubbery guts, plunder the slime pits, and retire in luxury?

Title: Reckless Space Pirates
Genre: Adventure, Indie, RPG

It hits you—hot, pulsing agony in every centimeter of you below the neck. You manage to slap the blob round your neck, and with that brief touch, the pain lessens a bit. At the same instant, you hear a strangled cry, and see Zeeber stagger on the other side of the transparent wall.

Your fingers begin to blur, and bright spots dance in the dark edges of your vision. You are losing consciousness, at best, or suffering nerve damage, at worst.

- I'll send Zeeber a little more pain.
- I'll try to comfort Zeeber.
- I'll curse the Medusi, and endure.
- I'll remove the sacrament and end the Trial.

"You don't have to be friends with Vikola and her crew," Gao tells you one day in the comm room, where he is scanning stock values on various worlds. He has so many hovers running, the displays cover the walls and the ceiling. "You have to make them respect you, though. Otherwise you might get left out of a lucrative side deal. Accidentally left behind on an alien world. You see what I'm saying."

You decide:

- I'll challenge Hammer to a game of Z-ball.
- I'll challenge Vikola to a shooting match.
- I'll impress in my own way, with a hilarious hack.
- I'll ask Ny-bat to teach me hand-to-hand--he's the best.
- I'll win at cards.
- I refuse to care what those pirates think of me.

"Lies! Excuses!" Krantic is yelling.

"Monsters! Torturers!" the Medusi leader yells back. A miniature lightning bolt streaks from one end of the worms on top of its hood, striking the long-faced pirate standing next to Krantic. The woman falls to the ground, convulsing.

Krantic's face is a terrifying marriage of rage and glee. "They are attacking! Kill them!" he shouts, shooting at the Medusa leader.

Do you:

- Shoot at the Medusi in the tent.
- Shout, "Hold your fire! They are shouting, not shooting!"
- Shoot Krantic.
- Point your gun at Krantic, but don't shoot yet.
- Grab Krantic's gun.

This is more of a 'maybe' recommendation, but when you come down to it that's essentially a 'no'.

First, the good: The parts of this book that are like an ordinary Choice of Games book (which is, in terms of volume, most of it), are decent. Allying/betraying the pirates, getting to know the crew, inscrutable aliens, and building up a powerbase: all good.

But, several times throughout the book, you'll be asked a brainteaser. E.g. one of those "what number comes next in this series" questions. And then you, personally, have to figure it out and answer. It doesn't matter that your character's a world-class hacker whose brain could run circles around anyone else on board, you have to do these problems yourself (or, for some of them, use google).

These segments are mostly toward the beginning and end, but every time they come up it completely kills the momentum of the story. It pulled me out of the "enjoying the experience" groove and into "oh goody math homework". And toward the end you'll be enduring four or five in a row as the aliens seek to test your knowledge (and again, not that of your character's).

In short, it's a decent book made worse by some very jarring distractions.. A rushed out, error riddled, sub par, railroaded mess.

There are numerous pronoun errors that have supposedly female characters suddenly being male. EX: "...to overlook his shady..." then directly followed by "She often poses..."

The dialogue and characters zip around too fast to keep track of at times. It has this weird minigame with logic puzzles and math that take away from the narrative elements to an insane degree and grind the flow to a screeching halt.

There are extremely limited choices that lead to an extreme feeling of contrivacy that left me wondering how any of this story was greenlit. The character interactions are shallow even for a CYOA game boiling down to "do I want ally" "do I want love interest"

Truly a mess of a story, a hackneyed writing attempt, poor editing, and meaningless choices.

Not quite as repetative as Kendrickstone, but as engaging and coherent as a drug trip.. This was a really good story. I would say that my only real complaint was that it seemed a bit rushed. It honestly seemed like right after beginning, it was over. Other than that though, I loved it. I'd give it an 8/10.
